Dear Hiring Manager,

I am writing to express my interest in a SOC Analyst, Junior Cybersecurity Analyst or Security Operations opportunity within your organisation.

I am a cybersecurity professional who has completed the Microsoft SC-200 Security Operations Analyst course through NEMISA (2026) and is preparing for the SC-200 certification exam. I have also completed the Google Cybersecurity Professional Certificate and developed a practical portfolio demonstrating my continued development in security operations.

My portfolio includes practical work involving Microsoft Sentinel, KQL-based investigation, detection engineering, threat hunting, Windows security event analysis, Velociraptor-based DFIR concepts and Python SOC automation. These projects have involved developing and documenting detection logic, investigating simulated alerts, analysing security events, mapping activity to the MITRE ATT&CK Framework and demonstrating incident-response and automation workflows. The work is available through my GitHub profile and cybersecurity portfolio.

In addition to my technical development, I bring more than a decade of South African public-sector experience as a Senior Personnel Officer in Human Resource Management. This background strengthened my ability to handle confidential information, support investigations, apply procedures and compliance requirements, maintain accurate records, analyse information and prepare clear reports. My experience as a Deputy Presiding Officer with the Independent Electoral Commission has further developed my operational coordination, procedural discipline, impartiality and ability to work responsibly in structured, time-sensitive environments.

I am seeking an opportunity to contribute these skills while continuing to grow in a security operations environment. I would welcome the opportunity to discuss how my practical cybersecurity work, investigative approach and professional experience could support your team.

Thank you for considering my application.

Yours faithfully,

Emmanuel Thabo Sakonta
